

## Be a 1Sky Washington Partner

*1Sky Washington is inspiring and organizing a statewide movement for real climate solutions.*

As part of the 1Sky Washington campaign, your organization is identified as a leader in a growing network of advocates for state, federal, and international policies that promote solutions. As a partner, you'll be asked to be a voice for healthy climate policy.

### 1Sky Washington Policy Platform

**CREATE FAMILY WAGE GREEN JOBS** in Washington with a statewide mobilization for climate solutions, energy independence, and investment in a new energy economy. Offer training to help Washingtonians, especially those who most need new employment opportunities, achieve economic security and take advantage of new jobs in the green economy.

**IMPLEMENT REAL LIMITS ON GLOBAL WARMING POLLUTION** by harnessing market forces to drive public and private investment in solutions, creating jobs, protecting consumers, and reducing pollution to safe, science-based levels. As we reduce pollution and invest in the transition to a clean energy future, we must provide direct and indirect financial support for low- and moderate-income families to successfully make that transition.

**REFOCUS ENERGY AND TRANSPORTATION INVESTMENTS** toward efficiency, clean energy, and transportation choices. Avoid major new investments and commitments that increase emissions and fossil fuel dependence.

As a partner organization, you'll receive campaign updates, timely action alerts, articles, and other relevant information. Please distribute these communications to your networks so that you can ensure that your friends, neighbors, customers, and members are aware and engaged with the critical climate work you are supporting.

**YES! Our organization/business wants to help advance the climate movement and endorses the 1Sky Washington policy platform.**

## What is 1Sky Washington?

*1Sky Washington* is a campaign to pass strong state policies to reduce global warming pollution, decrease our dependence on fossil fuels, and transition Washington to a clean energy economy. The campaign is led by Climate Solutions and Washington Environmental Council, working with a diverse array of partners across the state.

Washington is already home to an impressive array of climate leaders in government, business, and civic organizations. These leaders come from all walks of life and all parts of the state – from pioneers in urban transportation to innovators in farm-based bio-energy; from high-tech investors to community-based organizations providing new opportunities for low-income residents to gain a foothold in the clean energy economy.

**To build real solutions – solutions as big as the problem – we must act together.**

That's what 1Sky Washington is for – a campaign that brings our diverse strengths together to accelerate the adoption of climate solutions. We are powered by our common sense of urgency and determination – our knowledge that the time to act is now. We believe that Washington can't wait for solutions.

We must activate, coordinate and make visible a powerful base of support from all walks of life. Together, our voices will signal irresistible public will for a bold transition to a clean energy future.

## What will 1Sky Washington do for you?

**Provide information and communication resources** to help your organization understand the issue, make the connections to your priorities, and become more involved in solutions.

**Highlight your organization/company's role in the climate movement on our website.** Our website's home page will feature a 1SkyWashington "Partner of the Month" section with your organization's name and logo or photo. This is a great opportunity to get the word out about your organization, your work on climate, and connect you with people throughout the state.

**Connect you with a team of experts** that can help to answer your questions about climate policy and the role it will play in building a strong economy in the Northwest.

**Help connect your organization and its members/constituents to practical solutions**, such as transportation choices, clean energy sources, and innovative, new green technologies, and help you network with other organizations who share your goals.

**Enlist and engage a growing network of organizations**, so that your organization's voice on climate protection becomes part of a broad movement for strong, regional leadership.
